

Batterii is seeking a **Senior Mobile Engineer** to join our highly collaborative product team. In this role, you'll be planning, developing, testing and shipping new features while enhancing and maintaining our customer facing SaaS application. You will also have the opportunity to expand your skill set on non-feature tasks in other areas of the software product depending upon your interest.

### **About You**

Our ideal candidate is an innovative self-starter who has a passion for learning new technologies. This candidate would also have a strong desire to make an impact on a customer-facing SaaS application while working on a collaborative team. You thrive in a fast paced environment.

### **Required**

- 2+ years of experience with native Android mobile app development
- 4+ years of software development experience
- Proficiency writing native Android apps in Java and Kotlin
- Understanding of app store publishing process (Google Play)
- Familiarity with Material Design and common Android design standards
- Strong skills in software design
- Understanding of the software development lifecycle

### **Wish List (flexibility for the right person)**

- Proficiency writing native iOS apps in Objective-C and Swift
- Proficiency building reactive, responsive user interfaces
- Experience with platform native camera APIs (AVKit, Camera2, etc.)
- Familiarity with RxJava, Android Lifecycle Components, OkHttp & Retrofit
- Experienced using RESTful APIs
- Knowledge of source code versioning tools, like Git
- Experience with front end web development (ES6, Ember.js) is a plus
- Ability to work independently in a flexible environment

### **About Us**

Batterii is a technology company that's re-inventing the consumer research industry. Our team collaborates with consumers all over the world to collect insights that inspire brands like Adidas, J&J, Lowe's, P&G, and more. Our environment and team are fast-paced, creative, data-driven, and inspiring to be around. We are looking for talented individuals who want to join our team.

### **About Our Platform**

Batterii offers native mobile applications for both Android and iOS that support the Batterii web app by allowing consumers to upload photos, videos and text to the Batterii platform and complete insight research Missions. Our server application is hosted in Google Cloud Platform (GCP) and a majority of our application architecture is built on GCP service offerings. We also have a handful of 3rd party service integrations to support the application. Our desktop web application is built with Ember.js.

### **Benefits**

Batterii offers a great benefits package available to all employees starting on their first day. In addition to a generous health/dental/vision insurance plan, here are some additional perks of working at Batterii:

- Flexible hours and the ability to work remotely
- Unlimited vacation days
- 401(k) match
- Snacks and beverages in the office including scheduled Green Bean delivery
- Company-paid parking close to the office
- Walking distance to OTR and numerous restaurants and bars
- Team building “Inspiration trips” (e.g., trips to a coffee roastery, brewery, laser tag)
- Budget for individual professional development (attending conferences, taking classes, etc.)

### **Let’s Talk**

If you think you would be a good fit for this role, we would love to talk. Please email a resume and cover letter to [jobs@batterii.com](mailto:jobs@batterii.com).
